B. Details of Performance

1. Reclamation District Flood Contingency Maps and Emergency Response Plans

This phase will result in the creation of a series of local LMA emergency response plans that meet Water Code Section 9650 requirements.

a. Identify Stakeholders and Organize a Project Management Team

Contractor along with the County will organize a Project Management Team consisting of stakeholders and local agency representatives involved in flood control. Contractor will facilitate a kickoff meeting to brief the Project Management Team on the project goals, objectives and approach. Contractor will develop and provide the GIS mapping specifications, descriptions of final deliverables, and Project Master Schedule for review and concurrence by the Project Management Team.

- Contractor will deliver a written report on activities and an approved Project Master Schedule of Activities updated as necessary as the Project proceeds.

b. Reclamation District Emergency Operations Plans (EOP)

Contractor will organize and facilitate meetings with each LMA and other local agencies involved in flood control and response to identify response triggers, command protocols, and administrative procedures relevant to emergency response for each reclamation district. Contractor will provide guidance to reclamation district officials on the rationale for each requested procedure and its importance for flood response and potentially subsequent federal disaster assistance. Potential for a joint plan among several mutually interdependent districts will be determined.

- Contractor will deliver a draft written Emergency Operations Plan for each of the LMAs.

c. Reclamation District Flood Contingency Maps

Following completion of the written LMA EOP, Contractor will organize and facilitate meetings with each LMA and other local agencies involved in flood control and response to develop the LMA flood contingency map which serves as the hazard-specific annex to the LMA EOP in accordance with CPG101 guidance. Meetings will be held with appropriate local and State agencies to collect key decision-making, topographic, and critical infrastructure information for display on the completed map. Contractor will then work with stakeholders to confirm potential breach scenarios and related options for reducing floodwater extent, depth, or duration of floodwaters as well as LMA levee patrol, communications, and logistical protocols. The results of this bottom-up, vertically and horizontally integrated, joint planning process will be entered into the GIS map files.

- Contractor will deliver a draft Flood Contingency Map for each of the LMAs.

d. Develop a comprehensive list of equipment and materials available for mutual aid in the Delta

Based on the results of the LMA planning effort and additional Contractor research, a comprehensive list of equipment and materials available for mutual aid will be developed. In addition to type, quantity, and location of material, additional information on access and communications will be developed.

- Contractor will produce a comprehensive list of equipment and materials available for mutual aid in the Delta.

e. Develop Final LMA Emergency Response Plan Approval

Contractor will organize and conduct a final meeting of the Project Management Team to approve and adopt products produced under this final Project plan. Contractor will assist appropriate agencies with understanding the process for completing approval and adoption of final products to meet AB156 requirements.

- Contractor will deliver final flood emergency response plans and flood contingency maps for the LMAs.

2. Solano Delta Region Evacuation Plan and Integration of Project's Final Products Into Solano County EOP

Contractor will develop an evacuation plan that integrates evacuation where necessary with plans to maintain both efficient ingress and egress access to islands, maintain populations in safe but temporarily isolated areas, and improved methods for accounting for residents.

a. Analyze Warning, Evacuation, and Resident Support Situation in LMAs

Contractor will conduct an analysis of the number, locations, and type of residents in each LMA. Somewhat different approaches to supporting and protecting residents may be called for each LMA. This analysis will provide the basis for developing an approach by Solano County public safety agencies to respond to public needs during flood threats. The analysis will also include potential recovery needs for potential actual impacts on the County from floods (e.g., debris removal) and probable courses of action for evacuations.

- Contractor will provide written analysis of evacuation and resident support needs for LMAs based on tour, research, and interviews with residents and public safety agencies.

b. Develop Draft Region Evacuation Plan and Route Maps

Contractor will use information gathered and developed in section 1 relevant to public safety agency responsibilities, in conjunction with the section 2.a. analysis, to develop

the draft structure and content for the evacuation and routing maps to be produced. A key objective is to ensure that the public safety agency plan to support Delta residents with either in-place support or evacuation/rescue is effective and consistent with the LMA plans. Contractor will develop a draft plan that includes command and control protocols as well as information and cues to assist with the maintenance of ingress/egress to impacted Delta areas, resident in-place support, and evacuation/rescue, if needed.

Once this draft plan is developed, Contractor will facilitate a meeting with surrounding county emergency organizations to review and coordinate the draft Solano evacuation plan and LMA flood safety plans with corresponding plans in those counties. Evacuation, rescue, supply delivery, and other transportation/service provision issues which would benefit from cross-county coordination will be identified and coordinated.

- Contractor will provide a Draft Region Evacuation Plan and Routes to include provisions for potential in-place support of residents. The Plan will be coordinated with surrounding counties. Contractor shall be responsible for preparing meeting agendas, taking notes and preparing reports for all conference calls or meetings. Notes shall be prepared in typed form and the original furnished to County within five days after date of the conference/meeting for concurrence prior to distribution to all attendees. Reports shall include the following items at a minimum:

- i. The date and place of the conference/meeting was held with a list of attendees. The roster of attendees shall include each attendee's name, organization, and telephone number.

- ii. Description of all discussions and action items identified at the meeting.

c. Develop Final Approval of Planning Products and Integration into Existing Plans

Contractor will facilitate a meeting with stakeholders to perform a final review of draft planning products and establish agreement on the approval process. Contractor will then work with Solano OES to determine the manner of integrating final products into existing emergency plans and procedures.

- Develop an approved, and if needed adopted, final LMA emergency response plans and Solano County Delta Region Evacuation Plan and Route Maps. Establish procedures and a plan for integrating final products into existing Solano County emergency plans.

C. Project Management

Contractor shall assign a Project Manager. The Project Manager shall:
