Ms. Curry further stated that in order to avoid over-representation for either city, if the appointed MTC representative is a city council member from either city or a supervisor who represents either city, then the MTC representative is appointed by the Solano Transportation Authority Board.

In response to a question from Supervisor Williams regarding posting requirements for vacancy notices and posting on the Solano County website, Ms. Draves stated all vacancy notices for the Board of Supervisors are posted per the Maddy Act on the County's website, under the Board of

Planning Program Manager Allan Calder introduced the item.

In response to a question from Supervisor Brown regarding FEMA funding to mitigate the potential of a landslide on Lopes Road, Mr. Walsh stated if the update for the Public Health and Safety is approved, a resolution will be executed, which will make the County competitive for future grants, although he can't specify if it will be a FEMA grant in particular.

Consultant Eli Krispi provided an overview of the work completed on the General Plan Public Health and Safety Chapter update.

In response to a question from Supervisor Vasquez regarding how to look at the enhanced focus on wildland-urban interface area and coordinating with the cities that have open spaces next to unincorporated areas of Solano County, Mr. Krispi stated this is a multi-jurisdictional program even though this chapter in particular only deals with the unincorporated areas. Mr. Krispi further stated this update is part of a larger program where the cities and the County work together to update their Housing Elements and Safety Elements at the same time to ensure all are looking at the same issues.

In response to comments from Supervisor Brown regarding FEMA, Mr. Bezek, stated this Health and Safety Plan update qualifies the County for FEMA disaster relief funds which are prioritized for communities that have an updated hazard mitigation plan. Mr. Bezek further stated this update also qualifies the County for California Disaster Assistance Act funds, which covers both repair and replacement of lost infrastructure and improvements as well as providing funding for hazard mitigation activities.

Supervisor Brown stated she has concerns regarding exits routes in the case of a natural disaster within her district. Supervisor Brown further stated she also has concerns regarding fire safety issues within her district. Supervisor Brown stated the County needs additional funding for these type of hazard mitigation needs.

In response to Supervisor Brown's comments, Mr. Calder stated the best practice for implementation of these types of policies would be to tie them to Capital Improvement Plan spending.

A discussion period was held.

Chair Mashburn opened and closed the public hearing with no comments from the public.

Supervisor Vasquez commented on the need for additional funding to provide for infrastructure improvements for both the County and the cities for potential damages as a result of climate change.

A discussion period was held regarding potential tax uses.

In response to a question from Supervisor Williams regarding the implementation of the plan being tied to the Capital Improvement Plan, Mr. Calder stated implementation could be tied to the Capital Improvement Plan and/or the Planning Work Plan so that decisions over the next years would relate to the General Plan. Mr. Calder further stated staff is also evaluating the creation of an implementation workbook, which is a summary document of the General Plan, so that when decisions are made, they can relate directly back to the General Plan.

Supervisor Williams commented in support of Mr. Calder's comments.

On motion of Supervisor Williams, seconded by Supervisor Vasquez, the Board adopted Resolution No. 2024-216, approving General Plan Amendment Application G-24-01 to update the Public Health and Safety Chapter of the General Plan to address recent State requirements for General Plans, including information relating to evacuation routes, minimum road widths and clearances around structures, mapping of known seismic hazards, current flooding and fire risk conditions, hazard mapping, flooding and fire hazard-related policies, a climate change vulnerability assessment, and comprehensively addressing the short-term and long-term threats posed by climate change. So ordered by a 4-0 vote with Supervisor Hannigan absent. (see Resolution Book)
