### **Bid/Proposal Attachment regarding the Darfur Contracting Act of 2008**

Effective January 1, 2009, all Invitations for Bids (IFB) or Requests for Proposals (RFP) for goods or services must address the requirements of the Darfur Contracting Act of 2008 (Act). (Public Contract Code sections 10475, et seq.; Stats. 2008, Ch. 272). The Act was passed by the California Legislature and signed into law by the Governor to preclude State agencies generally from contracting with “scrutinized” companies that do business in the African nation of Sudan (of which the Darfur region is a part), for the reasons described in Public Contract Code section 10475.

A scrutinized company is a company doing business in Sudan as defined in Public Contract Code section 10476. Scrutinized companies are ineligible to, and cannot, bid on or submit a proposal for a contract with a State agency for goods or services. (Public Contract Code section 10477(a)).

Therefore, Public Contract Code section 10478 (a) requires a company that currently has (or within the previous three years has had) business activities or other operations outside of the United States to certify that it is not a “scrutinized” company when it submits a bid or proposal to a State agency. (See # 1 on the sample Attachment).

A scrutinized company may still, however, submit a bid or proposal for a contract with a State agency for goods or services if the company first obtains permission from the Department of General Services (DGS) according to the criteria set forth in Public Contract Code section 10477(b). (See # 2 on the sample Attachment).

The following sample Attachment may be included in an IFB or RFP to satisfy the Act’s certification requirements of bidders and proposers.

**Therefore, to be eligible to submit a bid or proposal, please complete only one of the following three paragraphs (via initials for Paragraph # 1 or Paragraph # 2, or via initials and certification for Paragraph # 3): YOUR BID OR PROPOSAL WILL BE DISQUALIFIED UNLESS YOUR BID OR PROPOSAL INCLUDES THIS FORM WITH EITHER PARAGRAPH #1 OR #2 INITIALED OR PARAGRAPH #3 INITIALED AND CERTIFIED.**

**7. Top three BOATING safety issues**

This is a Federal Pass-Through 'Recreational Boating Safety Grant'. The purpose of the grant is to promote boating safety and to decrease the number of accidents, injuries, and fatalities on U.S. waters. Clearly identify the top three BOATING safety issues that affect recreational boaters in your jurisdiction and describe how the requested grant will address these issues. Your answer to this question will be referenced throughout this grant application.

1-To provide education and enforcement for all applicable federal, state, and local regulations for safe vessel operations and recreational water sports.

2-Maritime Search and Rescue (SAR) operations for the location and provision of aid to lost and injured persons and vessels in distress.

3-Identification, prevention, and recovery of drowned bodies, evidence, and navigational hazards which cause preventable vessel accidents.

The Solano County Marine Patrol has two main patrol vessels that are stationed in the water at all times. These two vessels are used the majority of the time for our daily boating safety enforcement patrols. The two replacement outboard motors that we are requesting funding for would be used to repower one of those two main vessels.

One of our main patrol vessels suffered a catastrophic engine failure over a year ago. This caused it to be out of service for approximately 14 months before a new engine could be sourced, purchased, and installed due to lingering supply chain issues. This negatively impacted all aspects of the main boating safety issues in our Area of Responsibility (AOR) as we had longer response times and increased transit times to and from certain patrol areas.

In an effort to avoid this happening again, we are requesting funding for new motors to replace our currently aging outboards prior to their failure. Our certified Mercury engine mechanic informed us that the expected use expectancy prior to failure for the current Mercury Verado 300 hp outboards we have is approximately 1500 hours. These motors were recently serviced at approximately 1200 hours of use each. As they are entering the range where failure becomes more likely, we are requesting this grant to secure funding prior to their eventual failure so as to reduce the time the vessel will be out of service while purchasing and sourcing new motors. In addition, Solano County spent approximately \$110,000 to replace the diesel motor in our other patrol vessel last year. There are no remaining funds in our Marine Patrol budget to cover or supplement the cost of new outboard motors should the current ones fail.

**Misc. Equipment Items Questions (Mercury Verado 350 hp motors)**

**11. Item Details**

- 11 a. Is this equipment general all-purpose gear? NOTE: person-specific  Yes  No items will not be funded.
- 11 b. Describe exactly what you are requesting and how this equipment will help mitigate the boating safety issues you identified in Question 7. If your requested quantity is more than one for any item, explain the need for having multiple items. (max. 2000 characters)

We are requesting funding to purchase two (2) new Mercury Verado 350HP outboard motors. The new motors will be used to replace the two (2) existing Mercury Verado 300HP motors currently in use aboard our 29' SAFE boat Defender. The current motors have approximately 1200 hours of use on them respectively. Our certified Mercury engine mechanic indicated that the projected lifespan of similar motors in use in a law enforcement capacity and our marine environment (salt and brackish water) ranges between 1500-2000 hours. Based on prior yearly use averages, the current outboards will pass the 1500 hour use mark and enter the possible failure range by the end of the calendar year. Due to supply chain issues we are attempting to secure the funding for replacement motors now to reduce the amount of time the vessel would potentially be out of service should the current engines fail. The other main patrol vessel in our fleet experienced a catastrophic engine failure and was taken out of service for approximately 14 months while a new replacement engine was sourced, purchased, and installed. We would like to prevent something similar happening again with our current motors as they are rapidly approaching the end of their working lifespan.

If we are unable to secure funding for new replacement motors then all areas of boating safety will be negatively impacted should our current motors fail. With only one patrol vessel available this will limit our marine patrol operators in choice of home port when conducting their daily boating safety enforcement patrols and responding for SAR operations. This lack of port choice will cause extended response and transit times to and from large regions of our AOR during both our daily

patrols and emergency responses.

**11 c. Describe any negative impacts to boating safety and/or boating enforcement if you do not get this grant.**

The patrol vessel that these replacement motors will be installed on is one of two patrol vessels in our fleet that are kept wet docked in "ready-state" 24 hours a day. The vessels are currently berthed in two separate marinas which are located strategically distanced from the boundaries of our AOR. This allows us to choose the best home port in order to reduce response and transit times to all areas of our AOR when conducting our daily safety and enforcement patrols as well as when responding for emergency situations.

Our current motors have approximately 1200 hours of use on them. The average lifespan for these types of motors, based on industry experts and our own certified service mechanic, is approximately 1500-2000 hours of use. Based on previous yearly average use for our agency, these motors will pass the 1500 hour use mark and enter the range where engine failure becomes more likely by the end of this calendar year. Should the current motors fail, the patrol vessel will have to be temporarily taken out of service until new/replacement motors can be sourced, purchased, and installed. There is currently no vessel in our fleet available to replace this vessel, even on a temporary basis, should the current motors fail. This vessel being out of service will extend response times for daily patrols and emergency responses to large portions of our AOR which are typically covered by this vessel when it is in service.

**11 d. Classify this request**

**Classify this request by choosing one of the following options and present a strong justification for the request**

- "Critical" (operations would cease without it)
- "Increased efficiency" (if it would save staff time, identify how much time)
- "Convenience" (it would make life a little easier)
- "Protection" of existing equipment (ex: shade tents, hoists to get the vessels out of the water, etc. to extend longevity)

Justify your classification of this request. (max. 300 characters)

Obtaining funding to repower our patrol vessel is critical. Should our current motors fail, there is no replacement vessel available and our fleet of two available patrol vessel would be reduced by half.

Percentage of time on the water this equipment will be used for:

Activity	Percentage
Boating Safety Activities	80
Search and Rescue Activities	20
Other Activities	
<b>TOTAL</b>	100.00

List any other activities this equipment will be used for: (max 300 characters)

The replacement motors will be used to keep our patrol vessel in service so we can more quickly and efficiently provide boating safety and enforcement patrols, SAR, and Dive Operation assistance in our AOR.

- 11 e. If you are not awarded your full request, would your agency be able to supplement the difference?  Yes  No

If yes, what percentage can you supplement?

**11 f. What other capabilities exist in your region for this equipment? Justify why it is not feasible to borrow this equipment from a neighboring agency.**

**Exhibit G - BOATING SAFETY AND ENFORCEMENT EQUIPMENT GRANTEE APPLICATION**

There are no other options in our region to replace this equipment. Our fleet does not currently have a replacement vessel available to supplement our fleet should the current motors fail. We can also not borrow motors or patrol vessels from other allied agencies for the amount of use and length of time we would need a temporary replacement vessel for while we wait to secure the funding, purchase, and installation of new motors.

**11 g. How and why did you select this particular model? Explain if this is standard equipment or do you need something specialized for your waterbody to meet your agency's needs? List less expensive models considered and explain why they are not being requested. List other funding sources available to your agency that could be used to purchase or partially purchase this equipment.**

The model we are requesting to purchase is the Mercury Verado 350HP outboard motor (x2). This model was selected for two reasons. The first is that the motors currently in use aboard our patrol vessel are Mercury Verado 300HP outboard motors. Different manufacturers, such as Yamaha or Honda for example, have different mounting and control systems than Mercury. Changing the mounting and control systems would require costly fabrication and control harness re-wiring, causing a lengthier overall replacement time.

The second reason is, the 350HP model is the same weight as the 300HP model and uses the same mounting brackets as the motors currently in service. The 350HP is more efficient with better low end torque than the 300HP. This saves gas and reduces strain on the motors when stopping and starting, something which patrol boats do frequently. This will save cost and increase the longevity of the motors over their service life.

There no additional funding source available.
