

**Solano Coalition
for Better Health**

June 20, 2016

Sarah Brooks
Deputy Director
Health Care Delivery Systems
Department of Health Care Services
1501 Capitol Avenue
P.O. Box 997413, MS 4400
Sacramento, CA 95899-7413

Dear Ms. Brooks:

It is my pleasure to write a letter to discuss the Solano Coalition for Better Health's support of Solano County Health & Social Services in the Whole Person Care Pilot being submitted to DHCS.

The Coalition is a consortium of local hospitals and health care providers, Solano County Health & Social Services, and the local education sector. The role of the Coalition is to facilitate efforts where all of our members work together in improving the health of our community. The Coalition is a 25-year-old organization, and the County was a founding member.

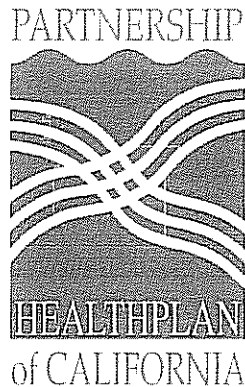

Solano County Health & Social Services has proven to be a highly collaborative and forward thinking member of the Coalition. Because of this, I am very confident that if awarded the Whole Person Care Grant Solano County will work closely with the other members of the Coalition to insure all of the resources available in our community will be employed to insure the pilot's success.

I fully support the efforts of the Solano County Health & Social Services department as they seek external funding to support a Whole Person Care pilot designed to improve care and health care outcomes, and improve supports for the most vulnerable people in our community.

Sincerely

A handwritten signature in cursive script, likely belonging to Joanie Erickson.

Joanie Erickson

Deputy Director, Health Care Delivery Systems
Department of Health Care Services
1501 Capitol Avenue
P.O. Box 997413, MS 4400
Sacramento, CA 95899-7413

Dear Ms. Brooks,

It is my pleasure write a letter to discuss Partnership HealthPlan of California's participation in the Whole Person Care Pilot being submitted to DHCS by Solano County Health and Social Services.

PHC is a member of the Solano Coalition for Better Health and very familiar with the Transitional Care Program. We look forward to being an active partner in the county's expansion of this program to outreach to high risk individuals known to have generated extremely high medical bills due to high risk medical conditions, lack of regular primary care, co-morbid behavioral conditions, and frequently, homelessness. We have been participating in planning meetings in preparation for this application and are prepared to share the data needed to find this population and evaluate the outcomes of the proposed interventions.

In conclusion, I fully support the efforts of the Solano County Health & Social Services department as they seek external funding to support a Whole Person Care pilot designed to improve health care outcomes, care and supports for the most vulnerable people in the county. Partnership HealthPlan is looking forward to partnering and participating in this exciting and innovative model.

Sincerely,

A handwritten signature in cursive script, appearing to read "Liz Gibboney".

P.O. Box 997413, MS 4400
Sacramento, CA 95899-7413

Dear Ms. Brooks:

This letter has been prepared to discuss Family Health Services' (FHS) participation in the Whole Person Care Pilot being submitted to the California Department of Healthcare Services (DHCS) by Solano County Health and Social Services.

The FHS clinic system in Solano County is a strong advocate for enhancement in the areas of data sharing, collaboration, and clinical care conferencing. As the FHS Executive Director, I have a seat on the Solano Coalition for Better Health (SCBH), wherein representatives from all the hospitals and clinic systems in the county meet and discuss strategies to improve service for Solano County residents. We, FHS, are also working together with members of the healthcare community and the Health Resources and Services Administration (HRSA) to address the unmet healthcare needs of homeless individuals in our community. The Healthcare for the Homeless Advisory Council provides input and counsel to the Community Healthcare Council, our clinic system's governing co-applicant board. I believe these endeavors provide good examples of the position FHS has taken with regard to whole person care. We would further be happy to expand our multi-disciplinary teams to include additional outside partners, given the opportunity.

To reiterate, I am completely supportive of the efforts of the Solano County Health & Social Services Department as they seek external funding to support a Whole Person Care pilot designed to improve health care outcomes, care, and support for the most vulnerable in Solano County. Family Health Services is looking forward to participating in this exciting and innovative model.

Sincerely,

Ted Selby, Executive Director

P.O. Box 997413, MS 4400
Sacramento, CA 95899-7413

Re: WPCP Letter of Support

Dear Ms. Brooks:

On behalf of Kaiser Permanente, we are writing to affirm our support of the Whole Person Care Pilot (WPCP) program being proposed by the Solano County Department of Health and Social Services to the California Department of Health Care Services. We understand that the WPCP will support development of the infrastructure needed to create a new model of efficient, integrated care for vulnerable Medi-Cal beneficiaries who are high users of multiple systems and have poor health outcomes, designed to support them in stabilizing their health and achieving their optimal well-being.

As a provider, we are responsible for approximately 24,067 Solano County Medi-Cal beneficiaries. The WPCP will be an important county-wide collaborative that includes a broad array of county agencies, hospitals and community health providers that will significantly impact our most vulnerable Medi-Cal beneficiaries. Solano County's WPCP program goals aligns with objectives of Kaiser Permanente to improve the health outcomes of our community.

Over the years, we have partnered with numerous organizations in Solano County that support and seek collaboration across care providers to proactively address social determinants of health and the non-medical, behavioral issues of patients of high need. Fostering interventions that address the underlying causes of patients with high need improves the overall health of populations and the community. Our support of the WPCP initiative leverages these efforts and reinforces our commitment to improving health outcomes.

If we can provide you with additional materials or respond to further questions, please let us know.

Sincerely,

Dear Ms. Brooks:

On behalf of the Behavioral Health Division of Solano County Health and Social Services, it is my pleasure to write a letter of participation in the Whole Person Care Pilot being submitted to DHCS by Solano County Health and Social Services.

As a constituent Division with a budget of approximately \$72,000,000, we operate both the Substance Use Disorder and Mental Health Programs under contract with the State Department of Health Care Services.

We have a history of strong interest in care coordination, bi-directional integrated care, and excellent collaboration with other agencies and our own sister Divisions. Both our primary care and specialty psychiatry clinics feature behavioral medicine/integrated primary care; and our Divisions (Health Services and Behavioral Health) recently completed a year-long Integrated Care Learning Collaborative with California Institute of Behavioral Health Services.

As a mid-size county, we have excellent working relationships with our sister Divisions and feature a number of collaborative projects that benefit from our close colocation, common management structure, and identity as a Super-Agency.

Behavioral Health is very pleased and excited to be one of the lead partners in this project and believe that the pilot will enable our community to take a further step in the direction of the Triple Aim and value-based care.

Behavioral Health is fully committed to prioritizing service access to clients identified in the pilot for psychiatric and substance abuse services, and in addition to covering its responsibilities under Medi-cal, will be offering in-kind resources to this project such as a SUD engagement specialist, quality assurance support and strong leadership to ensure this project achieves its commendable aims.

Currently, the Behavioral Health Division is undertaking a cultural transformation program that will last 5 years with Professor Sergio Aguilar at the University of California at Davis, Center for Health Disparities.

We believe that with the opportunities that O.D.S. presents, our history of active work toward reducing silo's, creation of an HIE (in progress), integrating care (SUD and MH both), we are well poised to assist the Department as the Lead Agency in this pilot.

In conclusion, I fully support the efforts of the Solano County Health & Social Services Department as it seeks external funding to support a Whole Person Care pilot designed to improve health care outcomes, care and supports for the most vulnerable people in the county. Our Division is already partnering and participating in the research and planning for this exciting and innovative model and looks forward to the opportunity to continue to do so.

Sincerely,

A handwritten signature in black ink, appearing to read 'Halsey Simmons', with a stylized, flowing script.

Halsey-Simmons, MFT

P.O. Box 997413, MS 4400
Sacramento, CA 95899-7413

Dear Ms. Brooks:

It is my pleasure to add NorthBay Healthcare's support of the Whole Person Care Pilot being submitted to DHCS by Solano County Health and Social Services.

NorthBay Healthcare is an independent, community-based, nonprofit, two-hospital system serving Solano County with acute hospital care services for residents and non-residents of the county. The 132-bed NorthBay Medical Center in Fairfield includes a Level 2 trauma center. NorthBay VacaValley Hospital in Vacaville is a community hospital with a 50-bed capacity.

NorthBay Medical Center is uniquely positioned as the only acute-care hospital in the central county. Compassionate care is extended to all, regardless of their ability to pay, distinguishing NorthBay from other providers in a county without a taxpayer-supported hospital.

NorthBay Healthcare has a long history of partnering with Solano County's Health and Social Services (SCHSS) department to provide key health services. We are a founding and current partner with the county's Transitional Care Program (TCP), providing respite housing for the homeless recently discharged from our hospital. The program required years of collaboration with the SCHSS before the program came to fruition four years ago.

Currently there are two TCP houses in the county that provide short-term residential services for many who otherwise would be discharged to the streets. This successful program is an excellent example of how hospital systems and counties can work together to serve those in need of help with shelter, food, case management, mental health and substance abuse services and support.

Additionally, NorthBay Healthcare continues to participate in the Solano County Mental Health sponsored monthly Psychiatric Emergency Services (PES) meetings. Other participants include other hospitals and prison system participants along with local law enforcement. These meetings provide a platform for sharing information that facilitates care process and program improvement.

With mental health problems growing and contributing to issues involving law enforcement, crisis

*Compassionate Care,
Advanced Medicine,
Close to Home.*

1200 B. Gale Wilson Blvd.
Fairfield, CA 94533-3587
ph (707) 646-5000

psychiatric care services and very often hospitalization, the PES meetings are invaluable. PES participants discuss challenges and opportunities for program and process improvement.

NorthBay Healthcare's senior management also participates in Solano Coalition for Better Health's meetings focusing on the adequacy of Primary Care Physicians and Behavioral Health service access for our community patients. Key community stakeholders also attend these meetings addressing service gaps and possible solutions.

The Whole Person Care Stakeholder (WPCS) program proposal as presented by Solano County Health and Social Services could provide some residential and outpatient case management coordination of care services and support for a very challenging population. In our emergency rooms and hospitals, we encounter many patients who would benefit from this WPCS program.

Many patients, who for various reasons (i.e., sex offenders, substance abusers, handicapped), are not able to access health care services and may become homeless. Not only will this program provide some respite living arrangements for some of these patients, but also provide for follow-up case management interventions to assist these patients with accessing much needed community resources to potentially prevent further issues.

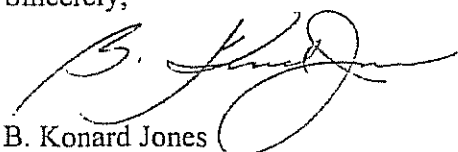

It should be a "win-win-win" for NorthBay Healthcare, the county and these patients! NorthBay Healthcare and the county will win by meeting the needs of our patients with outpatient coordination of care services, support and housing assistance, and ultimately, by providing much-needed environmental stability and support. The winning outcome of this pilot will be an increase in preventive and primary care visits and a reduction in costly, unnecessary hospital emergency room visits and hospital admissions.

NorthBay Healthcare has emergency room case managers, outpatient complex case managers and hospital social workers who could assist with identifying appropriate patients for the Whole Person Stakeholder program. We are eager to work with the county and identify WPCS program contacts to assist these patients in accessing resources to improve their quality of life. We can also share appropriate data relative to patient identification and outcomes.

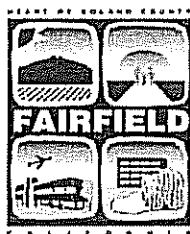

In conclusion, I fully support the efforts of the Solano County Health & Social Services department as they seek funding to support a Whole Person Care pilot designed to improve health care outcomes, care and supports for the most vulnerable people in the county.

NorthBay Healthcare is looking forward to partnering and participating in this exciting and innovative model.

Sincerely,

B. Konard Jones
President, Hospital Division
NorthBay Healthcare Group

Dear Ms. Brooks:

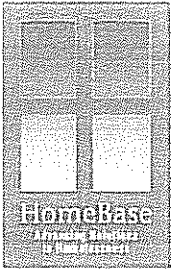

The City of Fairfield Housing Authority is committed to supporting Solano County Health and Social Services in the Whole Person Care Pilot being submitted to DHCS.

Solano County Health and Social Services have had a long standing relationship with the City of Fairfield Housing Authority. In the recent past we have collaborated on a variety of grant submissions, permanent supportive housing projects. Our agencies assist the same vulnerable populations and moving forward we will continue to partner to establish a coordinated entry system.

In conclusion, I fully support the efforts of the Solano County Health & Social Services department as they seek external funding to support a Whole Person Care pilot designed to improve health care outcomes, care and supports for the most vulnerable people in the county.

Sacramento, CA 95899-7413

Dear Ms. Brooks:

I am writing to express HomeBase's support of Solano County Health and Social Services' (SCHSS) Whole Person Care Pilot program application.

As a technical assistance provider in Solano County, HomeBase has worked with the County and local providers for many years in their efforts to end homelessness and provide coordinated services. The Whole Person Care pilot presents a tremendous opportunity to develop coordinated care for the highest-need individuals, a population that is currently underserved in the County. Developing this missing piece of the system of care would help Solano in all its efforts to address and end homelessness, including the development of a coordinated entry system.

We fully support the Solano County Health and Social Services department's efforts in seeking external funding through the Whole Person Care Pilot program in order to improve health care outcomes, services, and support for Solano County's most vulnerable individuals.

Sincerely,

Martha Fleetwood
Executive Director, HomeBase

Housing First Solano

June 27, 2016

Sarah Brooks
Deputy Director
Health Care Delivery Systems
Department of Health Care Services
1501 Capitol Avenue
P.O. Box 997413, MS 4400
Sacramento, CA 95899-7413

Dear Ms. Brooks:

Housing First Solano (HFS), the Vallejo-Solano County Continuum of Care, supports Solano County Health and Social Services (SCHSS) in the Whole Person Care Pilot being submitted to DHCS.

HFS is dedicated to creating and maintaining a system of care to end homelessness in Solano County. Increased integration between health, behavioral health, and homeless services, particularly among the hardest to serve, is vital to this effort. According to Solano County's 2015 Point-In-Time Count, thirty-two percent (32%) of people experiencing homelessness reported that they have psychiatric or mental health conditions, but only thirteen percent (13%) reported using mental health services. Forty-six percent (46%) reported drug and alcohol abuse, while only nine percent (9%) reported utilizing drug and alcohol counseling services. Facilitating these connections and creating new resources for those who need additional help are critical steps in helping frequent systems users obtain and maintain housing and improve their health outcomes.

SCHSS is an active member of HFS and is well-positioned to lead the Whole Person Care effort in Solano County. They work closely with other providers throughout the County and have been active in HFS's efforts to improve coordination with healthcare, create plans for jail and prison discharge, and increase use of data for system performance measurement and coordination.

In conclusion, HFS supports the efforts of SCHSS in their application for the Whole Person Care pilot designed to improve health care outcomes, care and supports for the most vulnerable people in the county.

Sincerely,

Tranine Chisom

Chair, Housing First Solano

Dear Ms. Brooks:

I am writing to express La Clínica de La Raza's support for Solano County Health and Social Services in its application for a Whole Person Care Pilot.

La Clínica has operated in Solano County for over ten years and we see the need for interventions that effectively address not only medical needs but the various social determinants of health. We have collaborated with the applicant for over ten years and are enthusiastic about the potential for this pilot to serve the County's most needy members more effectively while helping bend the health care spending curve. I believe the model as planned can help achieve Triple Aim outcomes of reduced cost per capita; improved population health; and improved patient experience.

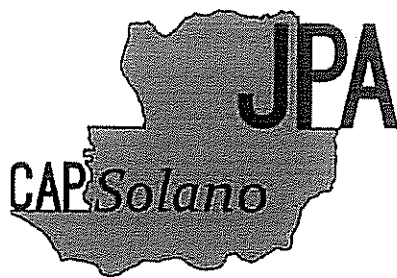

If the project is funded, La Clínica will support it to the best of its ability. We are committed to partnering in ways that are mutually supportive of our patients, including but not limited to: participating on the Steering Committee; providing primary care, integrated behavioral health and other supportive services to identified patients; working with other agencies to coordinate care and services; and helping support a robust program evaluation.

I am pleased to support this proposal and hope you will consider it favorably.

Sincerely,

Jane García, MPH

Dear Ms. Brooks:

On behalf of the Community Action Partnership (CAP) of Solano, Joint Powers Authority (JPA), I write this letter in support of Solano County Health and Social Services' application for the Whole Person Care Pilots Program.

CAP Solano JPA is the community action agency for Solano County responsible for the oversight of Community Service Block Grant funding and coordinating with social service agencies to address the causes of poverty and homelessness. CAP Solano has had the pleasure of working with Solano County Health & Social Services to identify gaps in social services and how best to collaborate with existing agencies and serve our most vulnerable population.

Solano County Health & Social Services has been a great partner with CAP Solano. We share a common goal of providing housing, healthcare, employment services, education, and mental health services to those needing these critical services in the most efficient and effective manner.

It is for these reasons, and more, that we fully support the efforts of the Solano County Health & Social Services Department as they seek funding to support a Whole Person Care Pilot designed to improve health care outcomes, care, and support for the most vulnerable people in Solano County.

Please do not hesitate to contact me if you should have any questions.

Supporting People, Supporting Community

June 29th, 2016

Sarah Brooks
Deputy Director, Health Care Delivery Systems
Department of Health Care Services
1501 Capitol Avenue
P.O. Box 997413, MS 4400
Sacramento, CA 95899-7413

Dear Ms. Brooks:

Bay Area Community Services has a long history of focused work with the severely mentally ill consumer and co-occurring populations in the Bay Area. We are very excited to be able to lend our support to this exciting project.

Among the projects we operate are supported housing arrangements offering a range of mental health and substance abuse services to individuals within a 7-story building in downtown Oakland, Ca. We have found the model of supported housing to be especially powerful as a core element of recovery, and consistent with the HUD's Housing First model. We also offer Crisis Stabilization, Peer Respite and Crisis Aftercare services within Solano County and provide critical services to its seriously mentally ill and co-occurring population.

We are in the process of renovating 7 2-bedroom units for Solano County in Fairfield at 345 Travis Boulevard, using unspent CalHFA MHSA Housing funds provided by the County, and can commit to providing up to 10 beds for the purposes of this project under this agreement. With our on-site peer respite program, and support by the County to provide on-site housing support, we are in an excellent position to help Solano and its partner applicant, Solano Coalition for Better Health, rapidly house enrollees in their Pilot TCP+ program while they are stabilized, and assist in locating more permanent housing. Using a Harm-Reduction model, we do not stipulate full sobriety or recovery from drug and alcohol abuse except when it would threaten the overall operation of the supported housing; this program philosophy is also reflected in our other services and allows us to ensure individuals stay housed as a precondition of their recovery, not recovered as a precondition of their housing. This model is extremely successful with the complex medical-behavioral needs of the individuals that will benefit from this program.

We understand the County will be exploring additional housing stock and supports as the needs of its target population are better understood and look forward to helping in any way we can.

I fully support the efforts of the Solano County Health & Social Services department as they seek external funding to support a Whole Person Care pilot designed to improve care and health care outcomes, and improve supports for the most vulnerable people in our community.

Sincerely,

Sacramento, CA 95899-7413

Dear Ms. Brooks:

When asked if we would write a letter in support of Solano County Health and Social Services, it was not difficult to decide to do so. In fact, it's my pleasure to specifically highlight their past and present partnership with us as being a model for public/private partnerships, and one that continues to grow. This grant is an example of that next step of growth as we discuss Mission Solano's participation in the Whole Person Care Pilot being submitted to DHCS by Solano County Health and Social Services.

Mission Solano has always believed in delivering holistic services in a person-centered environment. This environment focuses on the whole person; thereby, ensuring the success in breaking the cycle of poverty, homelessness, addiction, or any compulsive behaviors that brought them to us and caused a destructive lifestyle.

Mission Solano resonates with the goals of Solano County Health and Social Services, as we understand that the overarching goal of the Whole Person Care Pilots is "the coordination of health, behavioral health, and social services, in a patient-centered manner with the goals of improved beneficiary health, and wellbeing through more efficient and effective use of resources".

We see that through the collaborative leadership and systematic coordination among public/private partnerships, Whole Person Care Pilot, Solano County Health and Social Services, and nonprofits like Mission Solano can and will identify target populations, share data between systems, coordinate care real time, and evaluate individual and population progress – all with the goal of providing comprehensive coordinated care for the beneficiary resulting in better health outcomes.

In conclusion, I fully support the efforts of Solano County Health & Social Services as they seek external funding to support a Whole Person Care Pilot designed to improve health care outcomes, care and support for the most vulnerable people in the county. Mission Solano is looking forward to partnering and participating in this exciting and innovative model.

Sincerely,

Dear Ms. Brooks:

Solano County Public Health is committed to participating in the Whole Person Care Pilot being submitted to DHCS by Solano County Health and Social Services.

We have been actively working with our colleagues in Health and Social Services on design of the proposed pilot and development of the proposal. Solano Public Health oversees and manages a number of the services that we will help clients of the Pilot to receive. In addition, we expect to play a major role in data sharing and evaluation of the Pilot.

Solano County Public Health fully supports the efforts of Solano County Department of Health & Social Services as it seeks external funding to support a Whole Person Care Pilot designed to improve healthcare outcomes, care and supports for the most vulnerable people in our county. Solano County Public Health is looking forward to partnering and participating in this exciting and innovative model.

Dear Ms. Brooks:

It is my pleasure to write a letter to discuss the Vallejo Housing Authority's (VHA) support of Solano County Health and Social Services (SCHSS) in the Whole Person Care Pilot being submitted to DHCS.

The VHA partners with SCHSS in a variety of ways, most recently as a referring agency to the City of Vallejo's Temporary Tenant-Based Rental Assistance Program for persons who are homeless or at imminent risk of homelessness. Two other prior collaborations include the establishment of an emergency winter ("warming") shelter for the homeless in Vallejo, and the development and implementation of a comprehensive program for the use of \$588,000 in City of Vallejo Participating Budgeting (PB) funds for the City's "Help the Homeless" Project.

In conclusion, I fully support the efforts of the Solano County Health and Social Services Department as it seeks external funding to support a Whole Person Care Pilot designed to improve health care outcomes, care, and supports for the most vulnerable people in the County of Solano.

If you have any questions, please contact me at (707) 648-4408, or Anne.Putney@cityofvallejo.net.

Dear Ms. Brooks:

It is my pleasure to write a letter to commit Substance Abuse Services (SCSAS) of Solano County to participation in the Whole Person Care Pilot being submitted to DHCS by Solano County Health and Social Services.

SCSAS provides services to Medi-Cal eligible individuals seeking to recover from substance abuse through services funded by SAPT-BG federal funds and Drug Medi-Cal, under contract with the State. We have worked as an integral service provider under the general Health and Social Service Umbrella with most of our fellow Divisions and other County Departments, including Mental Health, Physical Health, Child Welfare, the Courts, and others. We are very excited that the Department is working with the Coalition to apply for funds to provide a comprehensive Whole Person Care pilot, and have experience providing integrated substance abuse services in the recent past. We are pleased to see that this proposed pilot shares important features with a very successful program that Substance Abuse Services oversaw assisting re-entering criminal justice involved women in recovery, funded through a Second Chance Adult Demonstration Grant from the Federal Department of Justice.

As a sister Division, we will not only provide the substance use treatment services we would normally, but we will provide prioritized 'fast track' access to services for the participants in this program. Additionally, we will be providing some in-kind staff participation to ensure that there is a close tie-in of the Pilot's staff to our SUD system of care and assist the Pilot in a variety of ways, including consultation, training, outreach, navigation of the Courts, and other areas in which our staff have relevant expertise. Data sharing will be handled by a 42 CFR Part 2 compliant release of information or with de-identified data that supports the goals of the Pilot.

In conclusion, I fully support the efforts of the Solano County Health & Social Services department as they seek external funding to support a Whole Person Care pilot designed to improve health care outcomes, care and supports for the most vulnerable people in the county. SCSAS is looking forward to partnering and participating in this exciting and innovative model.

Respectfully,

A handwritten signature in black ink, appearing to read "AM Williamson", followed by a long horizontal line.

June 30, 2016

Sarah Brooks, Deputy Director
Health Care Delivery Systems
Department of Health Care Services
P.O. Box 997413, MS 4400
Sacramento, CA 95899-7413

Dear Ms. Brooks:

It is my pleasure to write a letter to discuss the Solano County Sheriff's Office support of Solano County Health and Social Services in the Whole Person Care pilot being submitted to DHCS.

The Sheriff's Office has a long history of working collaboratively with Health and Social Services on behalf of transitioning individuals with medical, mental health and substance use disorders to the community. We have an embedded H&SS Mental Health Provider within the jail to assist in the transition of individuals from jail to community. Jail healthcare providers and H&SS cooperatively care for individuals enrolled in H&SS chronic care clinics. In 2015, the Sheriff's Office and Health and Social Services partnered to develop and win a grant focused on a county-wide approach to recidivism reduction for mentally ill offenders. This grant has allowed for the development and leverage of resources from various county departments in support of reducing incarceration and jail time for the mentally ill.

The Sheriff's Office staff serves with H&SS on multiple committees and projects that assist each agency in the identification of needs within our communities. Currently, the Sheriff's Office participates in Solano County Local Public Health System Assessment and serves on the H&SS Criminal Justice Workgroup, which is focused on the Affordable Care Act at this time. Additionally, we participate in the Psychiatric Emergency Services Committee. The PES reviews systemic service needs for our mental health population. Community law enforcement agencies and community providers meet monthly to review the issues, and individual consumers are discussed post-meeting to identify specific areas of improvement.

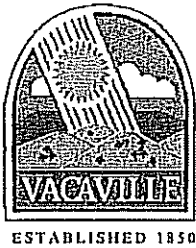

In conclusion, I fully support the efforts of Solano County Health & Social Services department as they seek external funding to support a Whole Person Care pilot designed to improve healthcare outcomes, care and supports for the most vulnerable people in the county. The Sheriff's Office commits to participating as a member of any necessary stakeholder group in order to assure the success of this effort.

Sincerely,

Thomas A. Ferrara
Sheriff-Coroner

RE: Letter of Support for Whole Person Care Pilot Program

Dear Ms. Brooks:

It is my pleasure to write a letter to discuss the Vacaville Housing Authority's (VHA) support of Solano County Health and Social Services (SCHSS) in the Whole Person Care Pilot being submitted to DHCS.

It is the understanding of the VHA that the goal of the Whole Person Care Pilot Program is to coordinate health care, behavioral health, and social services to improve overall health of households through effective utilization of resources. This program would increase access to mental health services and medical health care services for Housing Choice Voucher Participants and residents of Vacaville.

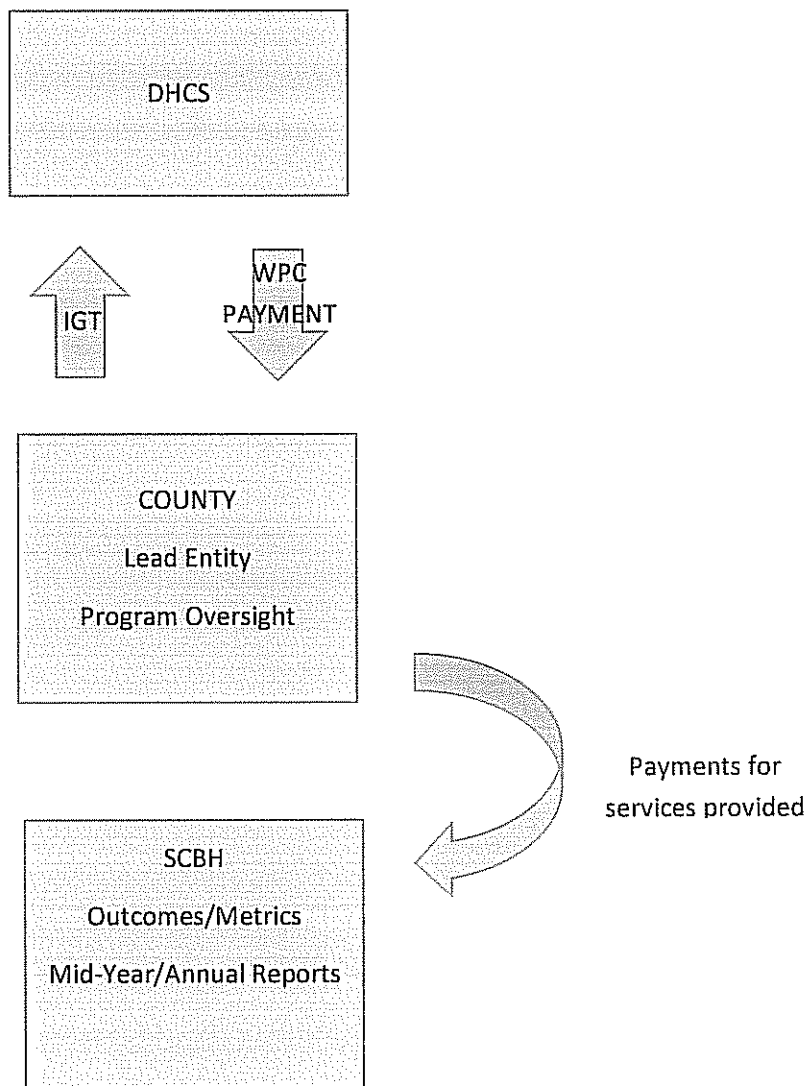

The VHA has worked with the SCHSS in the coordination and delivery of information regarding the benefits received by VHA housing choice voucher participants. This coordination has helped in reducing the administrative impact on the VHA and the SCHSS department in obtaining and providing benefit information. The SCHSS has worked with the VHA since 2009 to identify potential applicants for the VHA's Family Unification Program (FUP) Vouchers. FUP housing vouchers are available to families with children who have not been able to reunify with their children or face separation from their children due to lack of adequate housing, and eligible former foster youth.

If the SCHSS department is successful in its application for funding, the VHA will collaborate with the project by distributing information about the project to Housing Choice Voucher participants and Vacaville residents.

In conclusion, the VHA fully supports the efforts of the SCHSS department as they seek external funding to support a Whole Person Care pilot designed to improve health care outcomes, care and supports for the most vulnerable people in the county.

Sincerely,

Emily Cantu
Director
