Policies

RS.P-1: Protect and enhance the County's natural habitats and diverse plant and animal communities, particularly occurrences of special-status species, wetlands, sensitive natural communities, and habitat connections. Actions to enhance or restore habitat areas should not cause adverse impacts to airports, including Travis Air Force Base.

Implementation Programs

Regulations

RS.I-1: Establish ~~a resource mitigation overlay district~~ provisions within the zoning ordinance to site, ~~and permit,~~ and regulate mitigation banks. The ordinance should include incentives to focus mitigation banks within the Resource Conservation Overlay areas.

Prior to establishing a new mitigation bank that would enhance or restore habitat rather than simply preserve existing habitat and that would be located within five miles of an airport operations area, and prior to the enlargement of such a mitigation bank, the project proponent shall prepare a wildlife hazard analysis evaluating the potential for the project to cause hazardous wildlife movement into or across the approach and departure airspace of the airport. All reasonably feasible mitigation measures, including measures to minimize wildlife movements that may pose hazards to aircraft in flight, should be incorporated into the project.
