EXHIBIT A
SCOPE**1. PURPOSE**

The purpose of this Contract is to establish responsibilities and procedures related to the Vocational/Employment services provided to minors detained at the Juvenile Detention Facility or otherwise under the jurisdiction of the Solano County Probation Department. This Agreement establishes a formal relationship between Solano County Office of Education (SCOE) and Solano County Probation Department (Probation) for the purpose of providing students in Juvenile Court and Community Schools (JCCS) an "Introduction to Construction Trades" course.

SCOE and Probation have a common interest in supporting the development of career and college readiness for the students in the JCCS. Career and technical education (CTE) provides young people with the skills and knowledge to pursue postsecondary goals and options for students who might otherwise be at risk of leaving high school. CTE programs and pathways reduce dropout and increase postsecondary success. It also increases the odds of youth obtaining employment following release.

The Construction Trades course in the JCCS will provide students with valuable experience that will support them in seeking employment. The program is planned for the Juvenile Detention Facility (JDF) and for the Golden Hills Community School (GH). Students that have started the program at JDF and are subsequently released will be able to access and complete the program at GH.

The "Introduction to Construction Trades" course will be operated at the JDF and youth that are released can continue the program through Golden Hills Community School. The "Introduction to Construction Trades" course is a three-semester program that provides an overview and introduction to the trades. Students are introduced to calculation and characteristics of materials, carpentry, framing, basic electrical wiring, welding, and plumbing. Students learn about the construction trades and construction careers. Coursework is project-based, providing students with opportunities to develop teamwork and project management skills. Students demonstrate responsibility for personal and occupational safety on the job site and have the opportunity to obtain Occupational Safety and Health Administration (OSHA) certifications verifying their competence.
