**SECTION C – APPENDIX**

FACILITY CONDITION ASSESMENT RENEWAL SCHEDULE..... C1

June 4, 2019

Honorable Board of Supervisors:

The County strives to protect its real estate assets to adequately support the programs and services they help make available to the public. The updated 5-Year Capital Facilities Improvement Plan (CIP) for FY2018/19 through FY2022/23 identifies needs, priorities, and estimated costs for major maintenance, equipment replacements, and improvements to County facilities. The CIP serves as a planning document to guide prioritization of recommended capital projects and inform the Board and the public of overall facilities improvement and funding needs.

Projects presented in the CIP support the County's mission, "to serve the people and to provide a safe and healthy place to live, learn, work and play" and are in alignment with the County's core values of **Excellence** to provide quality, integrated, sustainable, and innovative public services and **Accountability** to take ownership, be fiscally responsible, and result-driven.

The CIP is intended to be a responsive and flexible planning guide, with a program of facilities improvements that can be modified based on new information or changed conditions. Because it is a planning document, not a project-specific proposal, the CIP is exempt from California Environmental Quality Act (CEQA) review.

Projects in the CIP are largely funded from the Capital Renewal Reserve Fund, the Accumulative Capital Outlay (ACO) Fund, General Expenditures, Public Facilities Fees and department dedicated/specific revenues. Other funding sources may include grants, bond financing, and

lease revenue bonds. Project funding sources are identified in the CIP only if the revenue source is certain. Limited County funding and reliable revenue streams to support capital renewal needs remains an ongoing challenge.

At this time, the CIP does not include the Three Campus Master Plan presented separately to the Board in 2017. It also excludes projects for Public Works/Transportation, County Fairgrounds (Solano 360), and the Nut Tree Airport, presented to the Board in separate annual reports. Projects to be completed in FY2018/19 as well as in-progress projects carried over into FY2019/20 are listed on tables immediately following this introduction.

### **GUIDING PRINCIPLES**

Principles considered in determining projects to be included in the CIP:

- Balance prioritized needs with available funding
- Utilize facility and real estate assets effectively
- Renew facilities consistent with expected life-cycle
- Implement sustainable building design
- Base new construction on operational need
- Dispose of surplus real estate

### **EVALUATION CRITERIA/ESTIMATED FUNDING**

CIP projects are prioritized based on five categories of relative importance: 1) promote public health and safety, 2) manage building code and regulatory compliance, 3) extend the value of real estate assets, 4) support operational efficiencies, and 5) reduce facilities operation/maintenance cost.

Estimated 5-year CIP funding needs, including capital renewal and replacement, is summarized below:

<b>5-Year CIP Estimated Funding Need</b>			
<b>Fiscal Year</b>	<b>Funded</b>	<b>Unfunded</b>	<b>Total</b>
FY 2018/19	\$6,144,000	\$0	\$6,144,000
FY 2019/20	\$14,075,000	\$4,210,000	\$18,285,000
FY 2020/21	\$2,991,000	\$29,388,000	\$32,379,000
FY 2021/22	\$0	\$6,001,000	\$6,001,000
FY 2022/23	\$0	\$3,880,000	\$3,880,000
<b>5-Year Total</b>	<b>\$23,210,000</b>	<b>\$43,479,000</b>	<b>\$66,689,000</b>

### **FACILITIES CONDITION ASSESSMENT**

The updated 2016 Facilities Condition Assessment (FCA) presented to the Board of Supervisors in February 2017 disclosed that annual investments are needed to maintain County facilities in good condition. At that time, the Board established a goal to maintain County facilities in good condition. This goal serves as a foundational basis guiding development of the CIP.

Consequently, investment in capital renewal for existing County facilities remains the predominant focus of recommended capital budgets for the foreseeable future. Such projects consist of replacement of air conditioning systems, upgrades to existing building automation systems/controls, exterior waterproofing, roofing replacements, parking lot paving, energy efficiency improvements, plumbing and lighting system upgrades.

Actual funding needs vary from year to year. To the extent funding is not available in any given fiscal year to address all recommended capital renewal needs, projects are prioritized per evaluation criteria noted above, with the

more important facility systems and components receiving priority.

The Department of General Services Capital Projects Management and Facilities Operations Divisions continue to work collaboratively to integrate CIP planning objectives with operational needs. The Capital Projects Management Division provides technical support relative to design, building code requirements, space needs/programming, and estimated project costs. The goal of maintaining the County's facilities in good condition will continue to be a strategic management focus of the Department of General Services.

### **CONCLUSION**

The 5-year Capital Facilities Improvement Plan is presented to the Board of Supervisors for review and approval on an annual basis. CIP projects recommended for funding in FY 2019/20 will be included in the capital projects budget request submitted by the Department of General Services to be considered by the Board of Supervisors at budget hearings. Effective management of the CIP includes forecasting future needs, establishing qualified priorities to support recommended investments, and identifying financing opportunities and strategic funding plans. An effective CIP requires collaboration, visioning, and organizational commitment to succeed.

Respectfully Submitted,

Birgitta E. Corsello, County Administrator  
Megan M. Greve, Director of General Services Department

<b>Total Cost</b>	<b>\$69,511</b>

**Description:**

The project is comprised of aggregated correction items found in the final Solano County Facility Condition Assessment Report, October 2016. Each deficiency/correction item was given a priority ranking according to the weighted order of importance:

1. Safety- Correction should be addressed immediately if left unaddressed could result in injury.
2. Performance/Integrity- Component or system has failed. Poses risk to overall system stability
3. Environmental - Improvements to air or water quality, including removal of hazardous materials
4. Modernization/Adaptation- Conditions, systems, or spaces that needs upgrade in appearance or function to meet current standards/needs
5. Lifecycle/Renewal- Future repair or replacement . Minimal substantial early-term consequence

Correction of deficiencies has been scheduled according to priority ranking. \$2.84M average investment over 10 years maintains County facility portfolio in 'good' condition. Projects are itemized in Section C- Appendix. Current funded capital renewal projects are individually listed in the CIP.
